EDUCATION

University of Waterloo

Bachelor of Software Engineering (Honours) – GPA: 3.92/4.00, AVG: 90.83%

Expected April 2029

Waterloo, ON

EXPERIENCE

Finta (YC W23)

Product / Software Engineering Intern

Incoming September 2026 – December 2026

San Francisco, CA

Shopify

Software Engineering Intern

January 2026 – April 2026

Toronto, ON

- Decoupled **React** marketing pages from a legacy data pipeline by migrating to on-demand **ShopifyQL**, enabling deprecation of infra driving **15%** of team on-call incidents and **50%** of monthly costs
- Resolved crashes on **3** marketing pages affecting **150+** shops by fixing **React** null-data handling
- Migrated direct queries to internal APIs across **33** files, standardizing data access for marketing pages
- Helped discover a case-sensitive collation risk affecting **60B+ rows** in a planned database migration
- Migrated **8 Rails** transactions to relaxed isolation, verifying read/write safety per operation
- Found and resolved **4** merchant-facing reporting UI regressions caused by a component library migration
- Detected a silent **GCP** failure blocking all new analytics pipeline jobs, averting days of data loss
- Fixed **5** bugs in Shopify's internal dev portal including search rendering, stale results, and mobile UX
- Built **Stickify**, a **React/Vite** tool that turns **Slack** messages into tickets, saving **30+** minutes daily

IdeaNotion Development Inc.

Software Developer Intern

May 2025 – August 2025

Markham, ON

- Built a **React**, **OpenAI**, and **.NET** summarizer that cut review time by **95%** across **4,500+** daily chats
- Rebuilt the chatbot agent config system in **React/Redux**, eliminating save errors for **150+** dealerships
- Resolved **35+** frontend bugs and **4** client support requests, driving an **18%** drop in reported issues
- Built **.NET** controllers to persist local user settings in **CosmosDB**, saving **400+** staff **1–2 mins per login**
- Built a **React** markdown editor for prompt authoring, cutting formatting time by **30%** for the AI team

Food Banks Canada (via IdeaNotion)

Contract Developer

May 2025 – August 2025

Markham, ON

- Migrated **62** endpoints in **5 .NET** controllers from raw **SQL** to **EF Core**, enabling type-safe data access
- Built **15+** reusable ACF content blocks with PHP on **WordPress (Sage)** for English and French pages
- Updated **20+** pages to match **Figma** designs with responsive layouts, fixing broken sliders on **3** pages

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, C#, C++, C, Python, Ruby, SQL, HTML, CSS, SCSS, PHP

Libraries: React, Redux, Node.js, Express, .NET, Rails, Flask, Laravel, FastAPI, LangChain, GraphQL, Tailwind

Tools: Git, Azure, GCP, Docker, MySQL, PostgreSQL, MongoDB, BigQuery, WordPress, Figma, Flink, Three.js, Cursor, Claude Code, Codex, OpenCode, Pi Harness

PROJECTS

 **LangSketch – Winner @ Hack the North** | *Electron, FastAPI, LangChain, LangGraph, Databricks, Martian*

- Built an **Electron** app that compiles drag-and-drop LLM workflows into runnable **Python** agents
- Integrated an LLM router for cost-optimized model selection, cutting inference costs by up to **60%**
