Education

University of Waterloo Expected April 2028
Bachelor of Software Engineering (Honours) – GPA: 3.94/4.00, AVG: 90.26% *Available May – August 2027*

Experience

Finta (Y Combinator, Winter 2023) September 2026 – Present
Software Engineering Intern *San Francisco, CA*

- Enabled an accounting agent to create depreciation schedules and automation rules by expanding **4 tools**
- Reduced unnecessary follow-ups in agent chats by reworking **RubyLLM** prompts and transaction searches

Shopify January 2026 – April 2026
Software Engineering Intern *Toronto, ON*

- Cut team infrastructure spend by **50%** and on-call incidents by **15%** by replacing a legacy pipeline that precomputed report data with on-demand **ShopifyQL** queries across merchant-facing **React** pages
- Audited **10+ tables** for a **MySQL-to-YugabyteDB** migration, identifying a primary key that could overload one shard and case-sensitive matching changes that could alter query results across **60B+ rows**
- Fixed crashes on **3 React** reports affecting **150+ shops/day** via fallbacks for missing analytics access
- Identified a **Terraform**-induced **GCP** failure blocking new ETL jobs, averting days of stale merchant data
- Prototyped a **React/Vite** Slack triage tool estimated to save employees **30 min/day** and pitched to execs

IdeaNotion Development Inc. May 2025 – August 2025
Software Developer Intern *Markham, ON*

- Built a **React**, **OpenAI**, and **.NET** summarizer that cut review time by **95%** across **4,500+** daily chats
- Rebuilt the chatbot agent config system in **React/Redux**, eliminating save errors for **150+** dealerships
- Resolved **35+** frontend bugs and **4** client support requests, driving an **18%** drop in reported issues
- Built **.NET** controllers to persist local user settings in **CosmosDB**, saving **400+** staff **1–2 mins per login**
- Built a **React** markdown editor for prompt authoring, cutting formatting time by **30%** for the AI team

Food Banks Canada (via IdeaNotion) May 2025 – August 2025
Contract Developer *Markham, ON*

- Migrated **62** endpoints in **5 .NET** controllers from raw **SQL** to **EF Core**, enabling type-safe data access
- Built **15+** reusable ACF content blocks with PHP on **WordPress (Sage)** for English and French pages
- Updated **20+** pages to match **Figma** designs with responsive layouts, fixing broken sliders on **3** pages

Technical Skills

Languages: TypeScript, JavaScript, C#, C++, C, Python, Ruby, SQL, HTML, CSS, SCSS, PHP
Libraries: React, Redux, Node.js, Express, .NET, Rails, RubyLLM, Flask, FastAPI, LangChain, GraphQL, Tailwind
Tools: Git, Azure, GCP, Docker, MySQL, PostgreSQL, MongoDB, BigQuery, WordPress, Figma, Flink, Three.js

Projects

LangSketch – Winner @ Hack the North | *Electron, FastAPI, LangGraph, Databricks, Martian*

- Built an **Electron** app that compiles drag-and-drop LLM workflows into runnable **Python** agents
- Integrated an LLM router for cost-optimized model selection, cutting inference costs by up to **60%**

CodeSpeak | *React, Tailwind, Flask, Express, Gemini API, Google TTS*

- Built a **React/Express** grid IDE for visually impaired users with **Gemini** assistance and voice interaction
